I am a scholar committed to investigating the complex relationships between society, space, and the governance of the built environment. My research examines how state institutions, market actors, and civil society intersect in the planning, design, and regulation of urban space, both through formal mechanisms and informal practices. These questions are central to my academic practice at TU Delft's Department of Urbanism, where I teach and research spatial planning with a focus on public policy, governance, social sustainability and spatial justice.

At the heart of my work is a concern for how planning systems shape access to land, housing, infrastructure, and public goods, and how they either reinforce or challenge existing patterns of inequality. I argue that sound governance is indispensable for addressing urgent urban challenges, such climate change, democratic erosion, environmental degradation, spatial inequality, and housing unaffordability. Spatial Justice, in its recognitional, procedural, distributive dimensions, is a necessary guiding principle in this context. I therefore advocate for spatial justice as a critical framework for evaluating and designing planning policies and projects, with the goal of advancing just transitions toward more sustainable and equitable urban futures.

My current trajectory aims to consolidate the Spatial Justice research line, bridging European policy frameworks (UP2030, UfM) with doctoral education and capacity building through the Centre for the Just City. My long-term goal is to strengthen the role of spatial planning as a democratic, justice-oriented, and globally engaged framework for design and policymaking.

1. Experience

2019-PRESENT: ASSOCIATE PROFESSOR OF SPATIAL PLANNING & STRATEGY (1 fte).

EDUCATION_ Development, coordination, and communication of courses in governance, strategic regional and metropolitan planning, and design. Courses: 'Research and Design Methodology for Urbanism' offered in Q3, participation in BK6MA3 Beheer & (Her)Ontwikkeling, the AMS Institute MADE course 'Metropolitan Innovators',

the European Master on Urbanism ‘**Urban Region Networks**’ EMU (now discontinued). I coordinated the Urbanism research and design graduation studio COMPLEX CITIES from 2008 to 2012.

GLOBAL OUTREACH_ Organising national and international events and courses. Key achievement: **the Centre for the Just City**, with Caroline Newton. Other achievements: **The Summer School Planning and Design for the Just City** (hosting c. 100 students per year since 2014) and **The Manifesto for the Just City** international workshop and book series.

RESEARCH QUALITY_ HORIZON PROJECT UP2030 Urban Planning and Design Ready for 2030, – Horizon Europe. Project funded under the Horizon Europe Climate-Neutral and Smart Cities Mission, which supports European cities in achieving their socio-technical transition goals toward climate neutrality by 2030. The project brings together a consortium of more than 40 partners—municipalities, research institutions, private actors, and citizen organisations—across Europe. As **Work Package Coordinator and member of the Steering Committee**, I am responsible for leading the development of the Spatial Justice Framework within UP2030, ensuring that climate-neutral transitions are implemented through inclusive, equitable, and democratic urban planning and design processes. This includes coordinating multidisciplinary teams in the creation of the **Spatial Justice Benchmarking Tool (SJB)** and the Justice Readiness Level (JRL) framework, which allow cities to assess the social and spatial dimensions of their climate strategies.

IMPACT_ UNION FOR THE MEDITERRANEAN STRATEGIC URBAN DEVELOPMENT ACTION PLAN 2040 & HOUSING POLICY FRAMEWORK. Consultancy project developed in partnership with the Dutch Ministry of Foreign Affairs, drafting **the Union for the Mediterranean (UfM) Strategic Urban Development Action Plan 2040, as well as the Housing Policy Framework, adopted by UfM member states.** This initiative supports the UfM Urban Agenda, a long-term framework promoting inclusive, green, resilient, and just urban transitions across the Euro-Mediterranean region. I was the principal drafter, and my contribution focused on integrating spatial justice, governance, and public value perspectives into the policy framework, offering methodological tools to evaluate social and territorial equity within urban planning and investment programmes.

The work involved advising on policy coherence and benchmarking systems aligned with the Sustainable Development Goals (SDGs) and the New Urban Agenda, ensuring that the plan addresses the diverse socio-spatial realities of Mediterranean cities while fostering regional cooperation and mutual learning among member countries.

2008–2019: ASSISTANT PROFESSOR OF SPATIAL PLANNING AND STRATEGY, TU Delft (0.8 FTE; 1.0 FTE from 2010 onward). Responsible for **curriculum development, course coordination, and research-led teaching** in the fields of strategic regional and metropolitan planning, governance, and spatial communication. In this role, I helped to shape the intellectual and pedagogical foundations of the Spatial Planning and Strategy section by integrating design thinking with governance and policy analysis, promoting a multidimensional understanding of planning as both a spatial and political practice.

My responsibilities included the design and coordination of MSc courses and a **studio focused on regional planning, strategic spatial development, and collaborative decision-making (Complex Cities), as well as mentoring MSc theses and supervising interdisciplinary projects.** During this period, I contributed to research and dissemination on spatial governance, metropolitan strategy, and planning education, establishing links between TU Delft and professional networks across Europe and Latin America.

2008-2010: POST-DOC RESEARCHER, UNIVERSITY OF HERTFORDSHIRE (0,2 fte, concurrent). Affiliated with the **Research into Practice Cluster** at the School of Creative Arts, Art and Design, under the leadership of Professor Michael Biggs and funded by the UK Research Council (AHRC). The project investigated the relationship

between academic and practice-based research, exploring how design disciplines, such as architecture, urbanism, and the creative arts, generate, articulate, and validate knowledge through creative processes.

My work focused on the **methodological integration of research and design** within professional and academic settings, examining how reflexivity, iteration, and experimentation can form the basis of rigorous inquiry in spatial design.

This work helped **bridge theoretical and practical paradigms of knowledge production**, contributing to the early academisation of design education and supporting TU Delft's efforts to align design studios with international standards of research excellence. It also laid the conceptual foundations for later initiatives linking design, ethics, and public value in spatial planning and urban design education.

2004-2008: FUNDED PHD CANDIDATE, DEPARTMENT OF URBANISM, CHAIR TU DELFT. (1 fte).
An Urban Geography of Globalisation: New Urban Structures in the Age of Hyper-connectivity. Bouwkunde, Department of Urbanism, TU Delft. Supervisor: Prof. Jürgen Rosemann. Doctoral research exploring the spatial and socio-economic transformations of cities and regions under conditions of globalisation and digital hyper-connectivity, focusing on how new information technologies, network infrastructures, and mobility systems reshape urban form, governance, and territorial organisation. The dissertation examined the emergence of two polycentric metropolitan regions (the Randstad and São Paulo), where transnational corridors appear as key expressions of a new urban condition defined by flows of data, speculative capital, and APS. [Link](#).

(www.just-city.org) The Centre was established as an interdisciplinary platform for education, research, and public engagement around the themes of spatial justice, governance, and social sustainability. Since its inception, it has become a recognised reference point in international debates on how justice-oriented approaches can inform urban planning, design, and policy. The Centre brings together scholars, practitioners, and communities from across the world through conferences, workshops, summer schools, and collaborative research, fostering dialogue on fairness, inclusion, and democracy in the built environment.

The Centre hosts the annual **Manifesto for the Just City workshop**, as well as **the Planning and Design for the Just City Summer School**. It supports the development of open-access educational materials, podcasts, and publications. Through partnerships with universities, civil society organisations, and international bodies such as UN-Habitat and the Union for the Mediterranean, as well as funded research projects, the Centre actively promotes the translation of spatial justice theory into actionable urban practices and policies.
